

# AT-RISK WORKING GROUP: MEETING 2

April 14, 2017  
Working Group  
Meeting

# TABLE OF CONTENTS

- Where We Left Off
- Goals for Working Group Meeting 2
- Moving Forward: Spotlight on Middle and High School
  - Introduction to Grad Pathways Data
- Next Steps

# WHERE WE LEFT OFF

At the last working group meeting, we discussed three broad problems that could be addressed through cross-sector collaboration:

Inequitable distribution of at-risk students across schools

Inadequate or inefficiently used funding for at-risk students

No structure in place for cross-sector sharing of best practices for serving at-risk students

Off-Track Secondary Students

Other?

Other?

# GOALS FOR TODAY'S MEETING

- Introduce Grad Pathways data and findings
- Begin to think about questions related to Grad Pathways and how the data could inform cross-sector policy proposals (Raise DC will present Grad Pathways data at the April 25, 2017, Task Force meeting)

**MOVING FORWARD:  
SPOTLIGHT ON MIDDLE  
AND HIGH SCHOOL  
STUDENTS**

# WHAT WE KNOW

## **We have a graduation problem:**

40% of 9<sup>th</sup> graders in DC schools (DCPS and charter) today won't graduate on time.

## **Signs of trouble emerge early:**

26% of the total variation in students' high school outcomes is observable by the end of 8<sup>th</sup> grade, with several measurable factors in middle school predictive of dropout and off-time graduation.

## **High-school quality matters:**

There is a 70% point difference in the on-time graduation rates of top-quartile grade 8 students between the highest and lowest performing high schools.

## **Let's focus on what works and make it widely available:**

Some schools are achieving graduation rates 14% points higher than what's expected, but these schools enroll only 9% of the highest-risk students.

**MIDDLE SCHOOL**

# PREDICTING DISENGAGEMENT: IMPORTANCE OF MIDDLE-SCHOOL INDICATORS

A tale of two students with different personal and academic profiles:

Student Characteristic		Student 1 (African American)	+/- Effect on Graduation Likelihood		Student 2 (African American)	+/- Effect on Graduation Likelihood
Baseline Graduation Rate		91%			91%	
Math Grade 8 CAS		Proficient	0%		Below Basic	-11%
Reading Grade 8 CAS		Proficient	0%		Basic	-12%
SPED		No	0%		Yes	-12%
LEP		No	0%		No	0%
CFSA/DYRS Involvement		No	0%		No	0%
Overage		No	0%		Yes	-12%
Grade 8 Absences		2	-1%		6	-2%
Grade 8 Fs		0	0%		1	-6%
Grade 6-8 Suspensions		0	0%		0	0%
Chance of Graduating On-Time		90%			36%	

Source: Graduation Pathways Project Summary (September 2014)

# EFFECT OF MIDDLE-SCHOOL INDICATORS & SCHOOL-QUALITY FACTORS

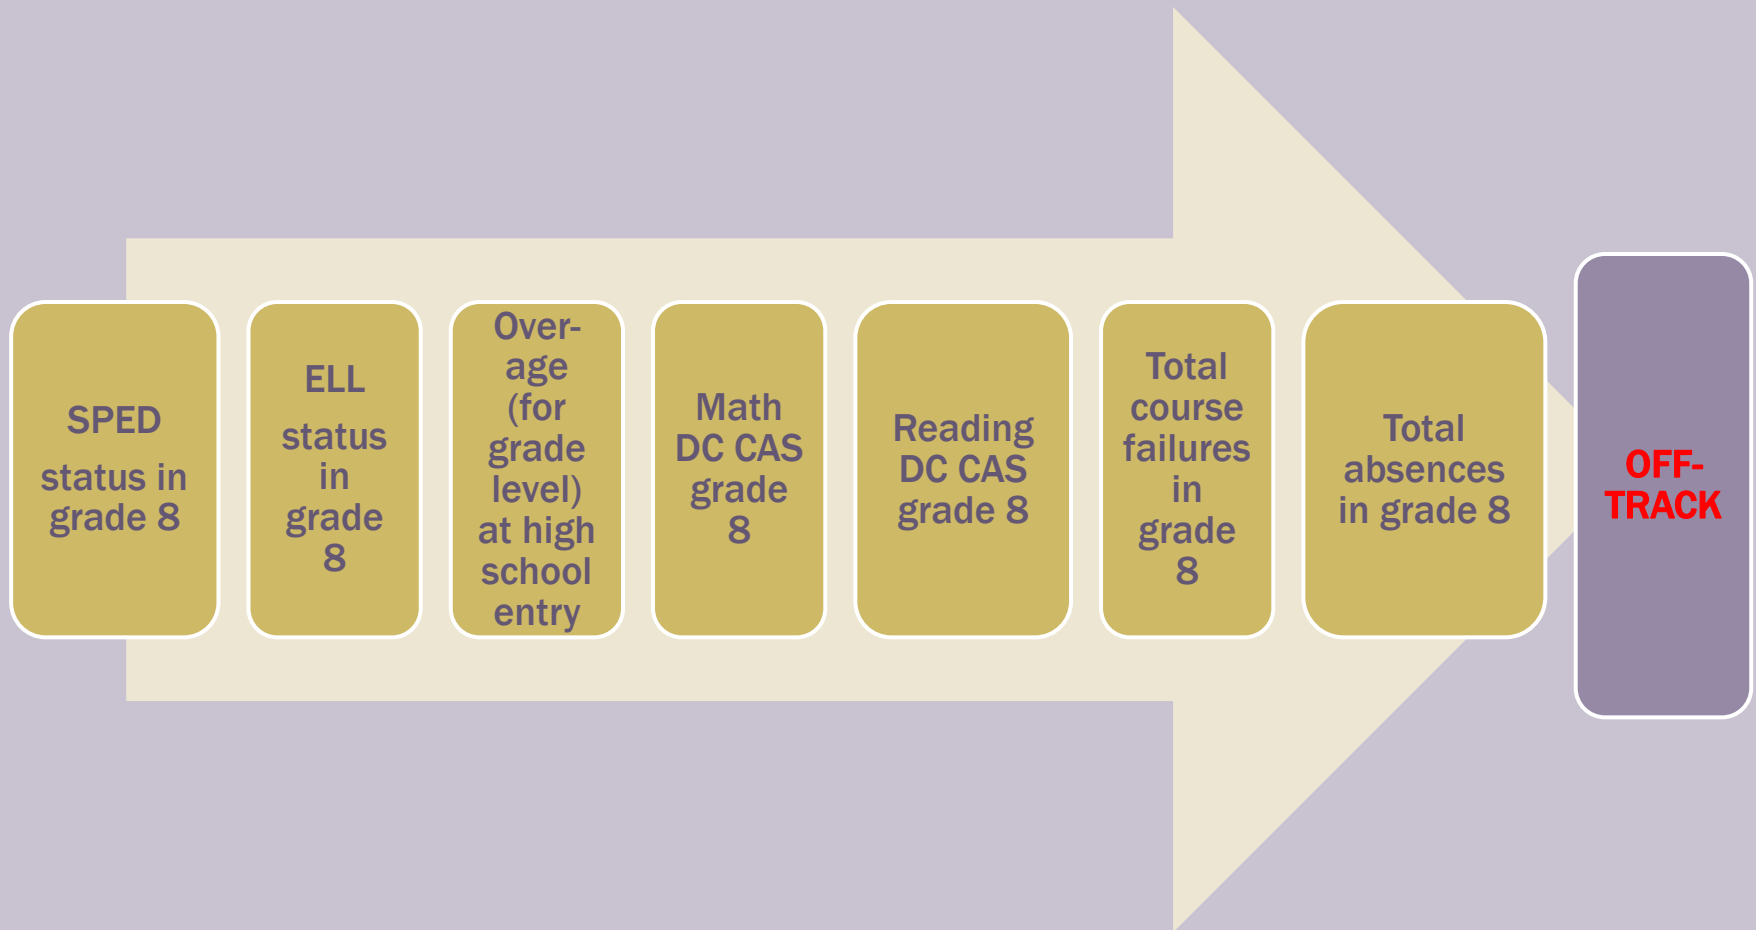

## Total effect of middle-school indicators

- About a quarter (26%) of the variation in on-time graduation rate is explained by pre-high school student characteristics

## School effects

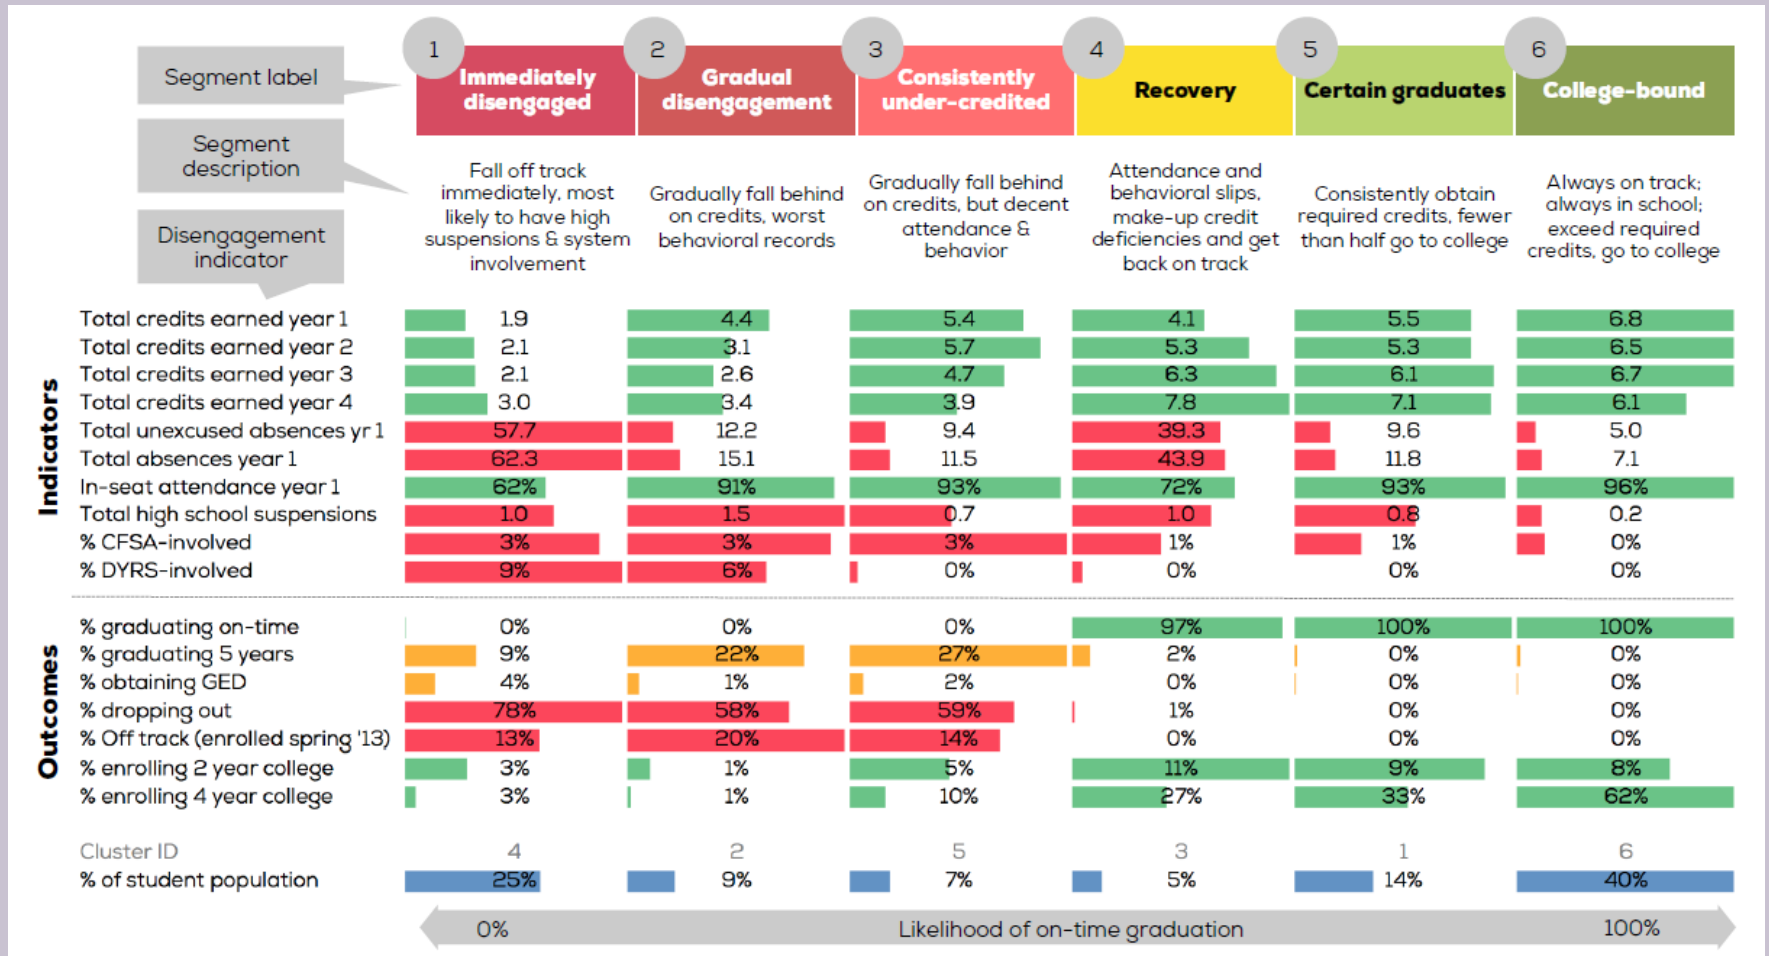

- School-level factors account for 40% of the variation in graduation outcomes
- 26% of that variation is from high-school quality and 13% is from middle-school quality

# KEY PREDICTORS OF DISENGAGEMENT AND OFF-TIME GRADUATION

**HIGH SCHOOL**

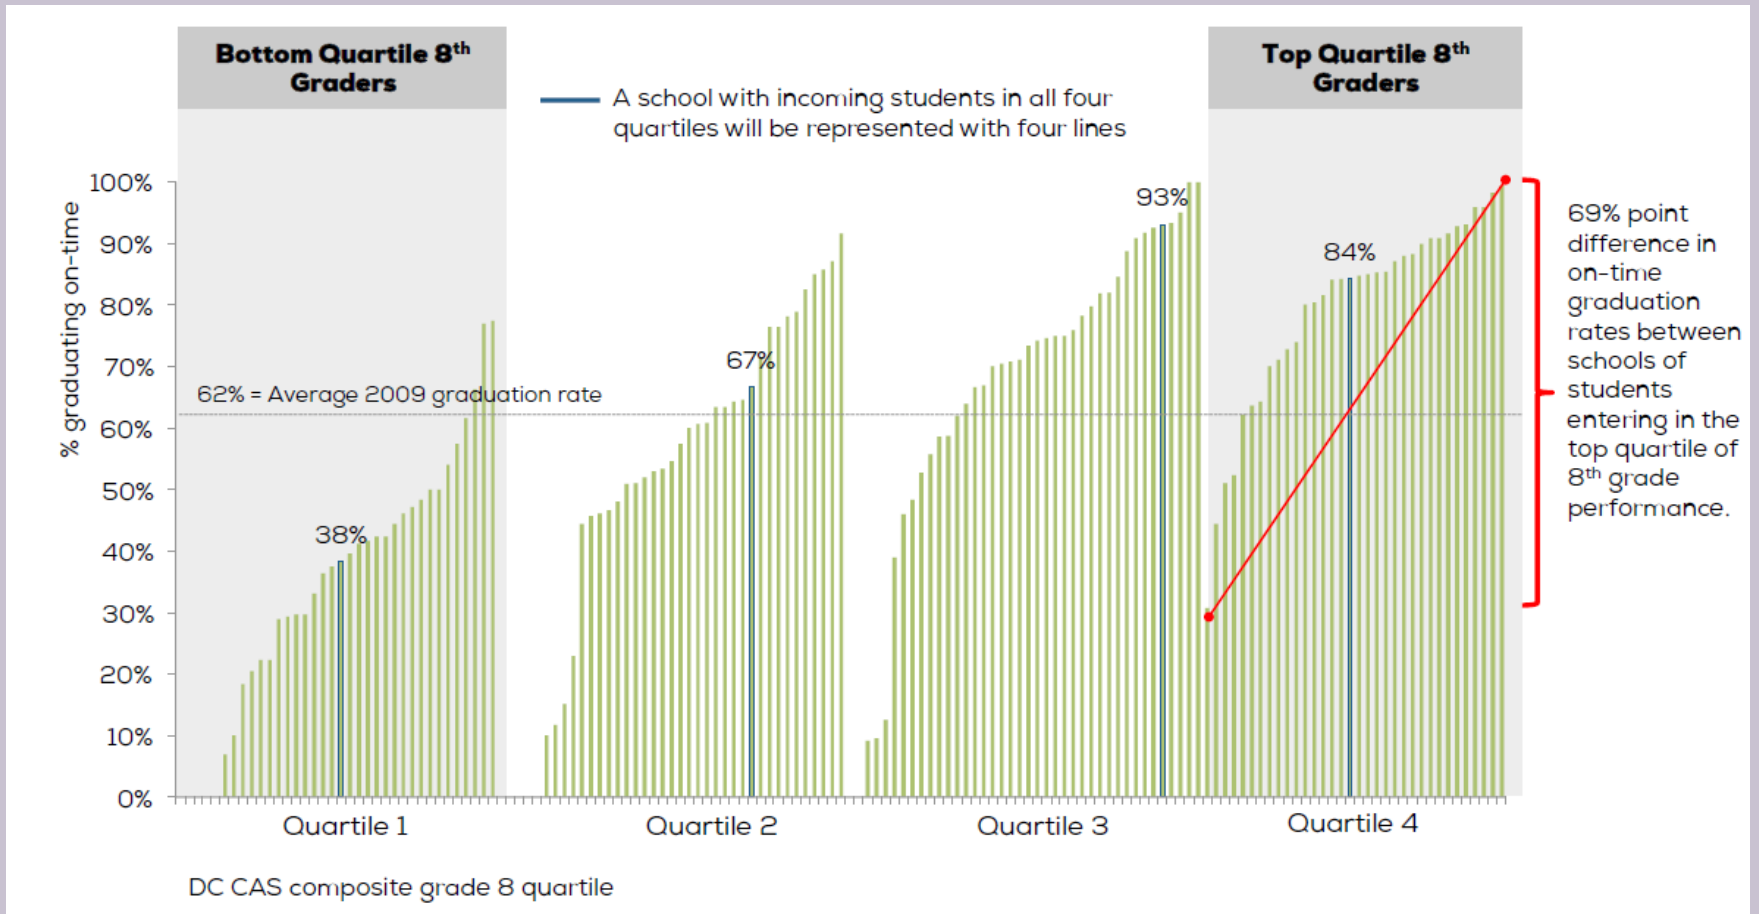

# EXAMINING DIFFERENT SEGMENTS OF HIGH SCHOOL STUDENTS

Source: Graduation Pathways Project Summary (September 2014)

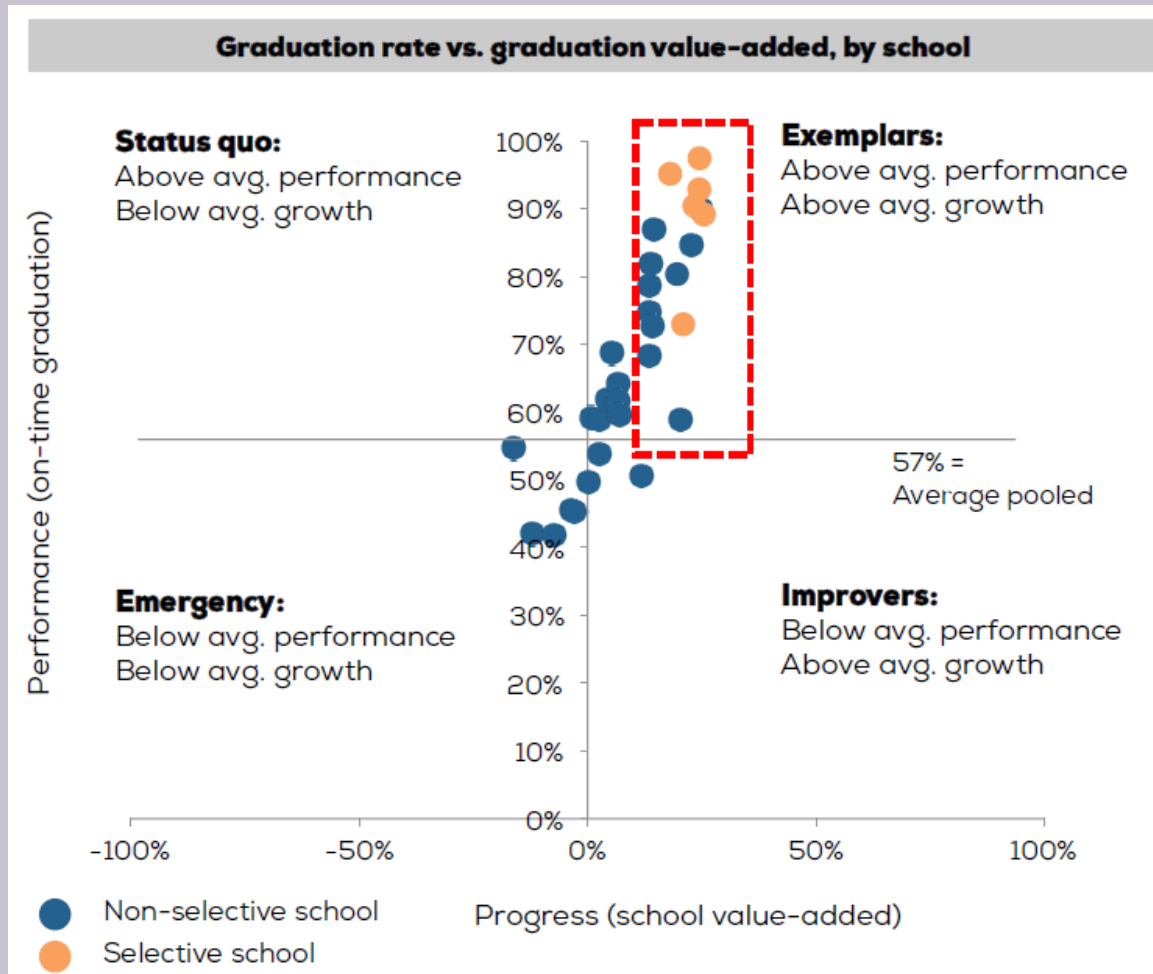

# HIGH-SCHOOL EFFECTIVENESS

After adjusting for incoming 9th graders' performance, there's still wide variation between schools' on-time grad rates:

Source: Graduation Pathways Project Summary (September 2014)

# SOME SCHOOLS BEAT THE ODDS

# DISPARITIES IN SERVING HIGH-RISK STUDENTS IN HIGH SCHOOL

## Too Few

- Only 9% of “high risk” students (those with probabilities of graduating less than 40% by the end of middle school) matriculate into a high value-added high school.

## Too Many

- Fully 50% of immediately disengaged students are concentrated in just 7 schools.

**NEXT STEPS**

# MEETING SCHEDULE

- Working Group meeting 3 will be part of the next Cross-Sector Collaboration Task Force meeting, scheduled for Tuesday, April 25, 2017, from 6:00pm – 8:00pm, at EducationCounsel, 101 Constitution Ave, NW
  - Raise DC will present on Grad Pathways
- DME will convene an additional call or meeting (Working Group meeting 4) in early May

# DME WORKING ON THESE FOLLOW-UP QUESTIONS:

- At what point does the concentration of at-risk students adversely affect school performance?
- Where are our at-risk students by Ward of school attendance (versus Ward of residence)?
- Who are our at-risk students by grade or grade band?
- What do we know about the fixed and variable costs for serving an at-risk student, particularly in those schools with high concentrations of at-risk students?
- What's the relationship between at-risk status and school quality?
- What are the most in-demand educational models (e.g., dual-language, Montessori)? Which models have been shown to be particularly effective in serving at-risk students?
- What's the relationship between teacher retention and at-risk status?
