

# 2023 Boundary and Student Assignment Study Supplement

Student enrollment pathways

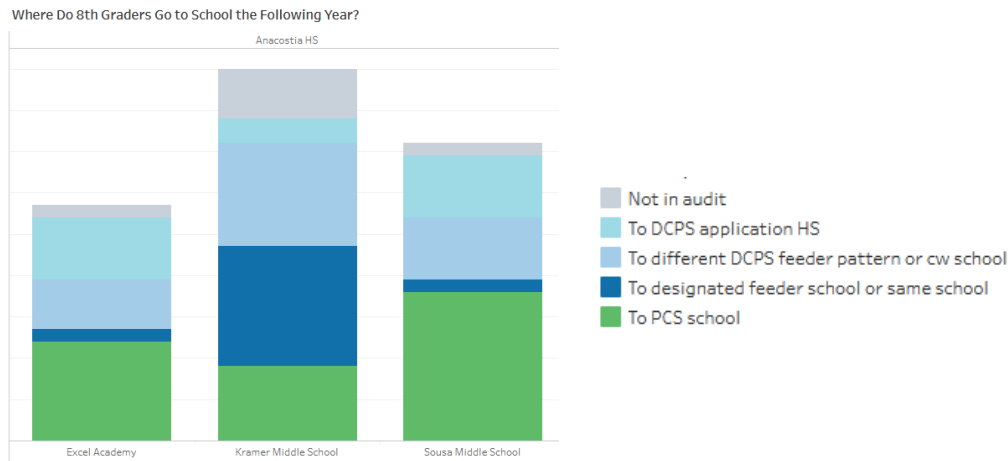

5<sup>th</sup> grade enrollment in DCPS geographic feeder classes

8<sup>th</sup> grade enrollment in DCPS geographic feeder classes

# Student Enrollment Pathways

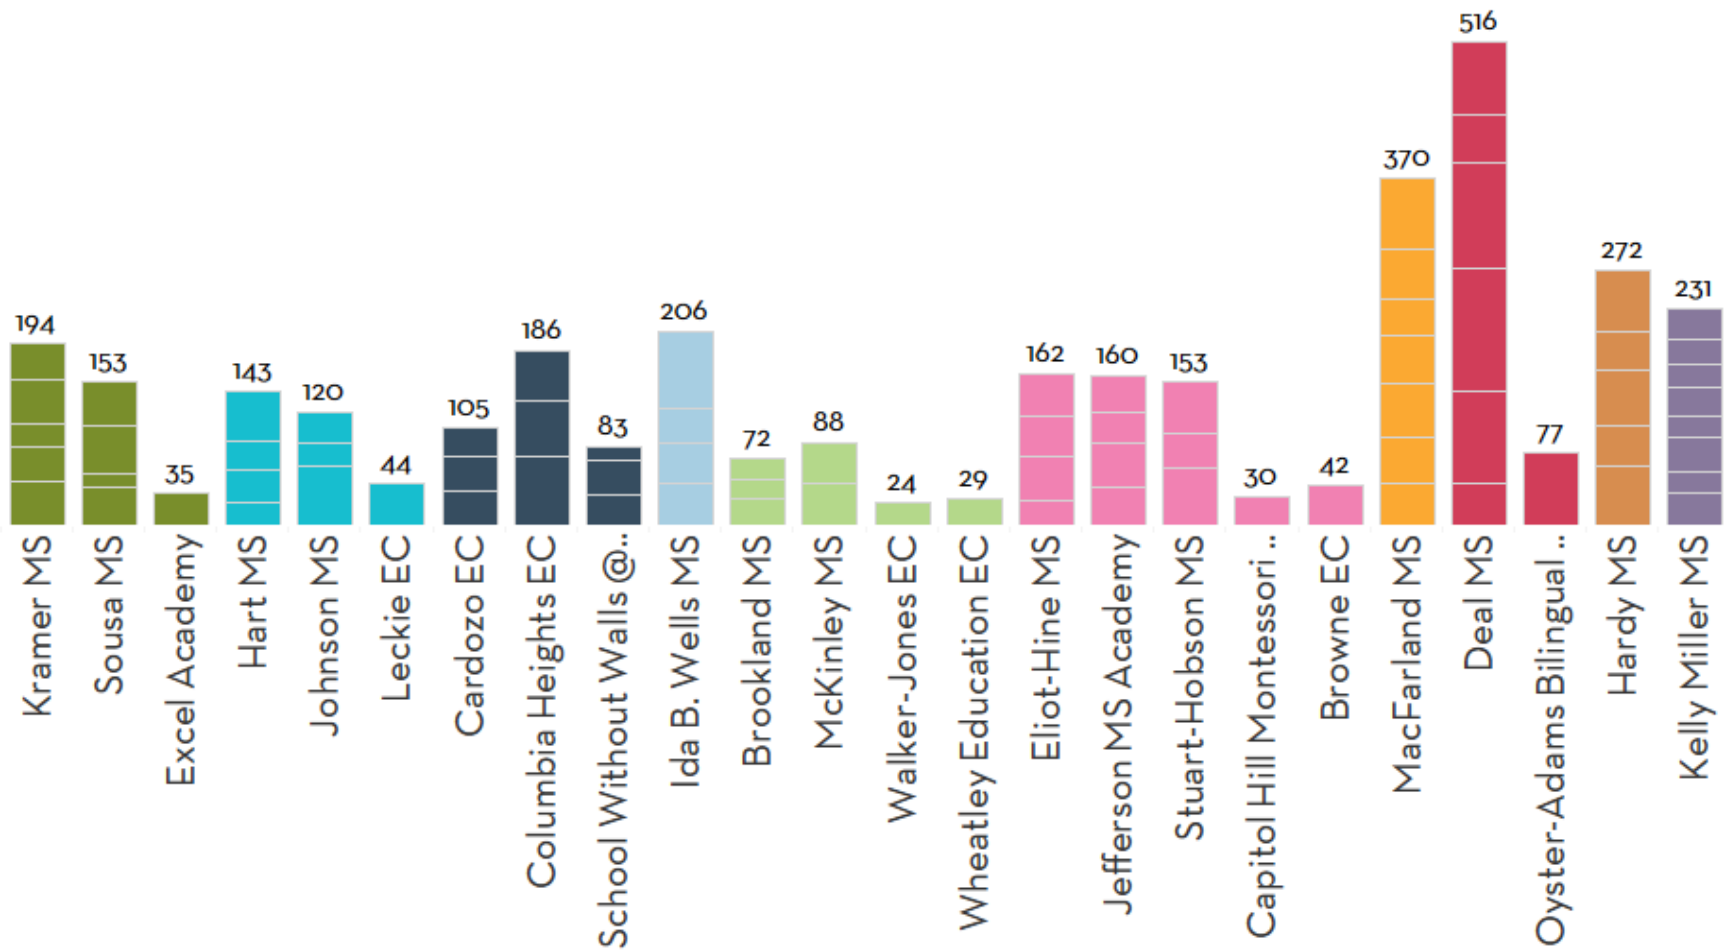

The Student Enrollment Pathways information on EdScape shows where students enrolled in school the year before (i.e., SY21-22 for students enrolled in SY22-23) or alternately, where students enrolled the next year (i.e., SY22-23 for students enrolled in SY21-22).

This information can be used to analyze feeder patterns (formal and informal) to support the Boundary Study. In addition to providing information at key transition grades (e.g., between 5<sup>th</sup> and 6<sup>th</sup> grade), the dashboards on EdScape allow users to drill down into all grades at a given school.
