   b. Additional background and research
   c. Additional student outcomes and data analysis
UPSFF Scope Questions

**ELL Weight Structure**

Should the English Language Learner (ELL) weight be **tiered**, reflecting differing costs by service needs, and along what line of differentiation (i.e. age, newcomer status, WIDA ACCESS level, etc.)?

What is the **appropriate proportion of additional funding for each recommended tier**, relative to the current ELL funding weight?
This study identifies multiple options to “tier” funding for ELL students, including at the grade level, by proficiency level and new to the country status

1. Similar to most states, the District funds all English Language Learner (“ELL”) students at the same level, regardless of demonstrated student need. However, several large, urban school districts and two states fund ELL students based on grade band and proficiency level.

2. The number of ELL students in the District has increased by 50% from FY15 to FY20, while funding in total dollars has increased by over 70% in that time. The achievement gap has also improved during that time, particularly for elementary school students in math.

3. This study has identified multiple options to tier funding of students based on grade band, while local and national practitioners also support incremental funding for students with limited or interrupted formal education (“SLIFE”). Additionally, student outcomes data reflect additional needs for students with low proficiency scores, though implementing a proficiency-based weight is more common for LEAs than States.

4. Implementation will require developing common definitions for student need, consistent data collection methodologies from all LEAs, as well as coordination with OSSE on any forthcoming changes to ELL exit requirements due to changes in the rigor of the World Class Instructional Design and Assessment exam (“WIDA”*).

*Note: The World-Class Instructional Design and Assessment (“WIDA”) ACCESS test is an assessment tool for ELL students utilized by over 30 states, including the District of Columbia
Students designated as ELL have increased by 50% from FY15 to FY20. This growth has impacted DCPS most significantly, with ELL students representing 15% of the total student population in FY20.

Note:
1) All data pulled from Enrollment Audit Reports at: https://osse.dc.gov/page/data-and-reports-0
2) FY15 excludes 14 ELL students at OSSE Managed Washington Hospitality Foundation
Annual total UPSFF funding for ELL has increased 71% from FY15 actual to FY20 projected; at the same time total ELL students have increased 50%
While UPSFF ELL funding weights have remained constant since FY15, the per pupil funding rate has increased by 16% as a result of increases to the foundation rate.

Note FY17 FY18 funding amounts reflect the retroactive increases stemming from the 2017 Washington Teachers' Union (WTU) contract agreement.
More than half of ELL students are in grades PK to 3, though the number of students significantly increases in 9th grade.

Source data – ELL student-level data from DME & OSSE
Data Filters: FY19 students flagged as "Yes" for English Learner Status and "Yes" for Enrollment Audit Population.
Nationally, ELL students represent a larger proportion in grades K-5 when compared to grades 6-12; however, DC’s proportion of ELL students increases in High School.

% ELL Enrollment by Grade
Nation vs. DC

- ELL students represent an increasing percentage of total students nationally – from 8.1 percent, or 3.8 million students in fall 2000 to 9.6 percent, or 4.9 million students in fall 2016.

The difference in higher grades between DC and National Average is partially driven by policy to place students in age-appropriate grades for High Schools, regardless of proficiency level.

DC ELL Data - Source data – ELL student-level data from DME & OSSE

FY19 District Audited Enrollment by Grade: [https://osse.dc.gov/node/1390091](https://osse.dc.gov/node/1390091)
What we have heard and learned through Advisory Group meetings and LEA interviews

1. In the District, **students placed in upper grades with lower WIDA scores require additional supports and resources** than younger students with lower WIDA scores.

2. Students receive **differing intensity and type of supports based on their WIDA level**. We heard: “the reality is that these students are actually supported based on their proficiency level”. **However, concerns exist over unintended incentives in attaching funding to WIDA level.**

3. School leaders have highlighted challenges associated with **supporting students new to the country**, including students with limited or interrupted learning. This challenge is exacerbated for LEAs with a limited number of sites (and resources to support these students).

4. School leaders also highlighted that **serving ELLs requires more than ESL teachers**; it requires bilingual administrative staff, interpreters, professional development, and additional parent engagement efforts.
What we have heard and learned through Advisory Group meetings and LEA interviews (cont.)

5. **DC has limited data on key groups of ELL students.** "WIDA screener" data is an optional data field for LEAs to complete, and no system is in place to collect data on students that have experienced interrupted formal education.
   - This data will be crucial to effectively implement funding based on student needs
   - Lack of a citywide definition for “newcomer” or “students with limited or interrupted formal education (SLIFE)” exacerbates this data problem
   - Only have performance data (WIDA and PARCC) for 1/3 of all ELL students

6. The WIDA ACCESS test became more rigorous in FY17, **resulting in an increased number of students remaining designated as ELL.** Multiple states have lowered WIDA score exit requirements to between 4.0 and 4.6. OSSE is researching this issue but does not anticipate a change in FY21.
   - Exit requirements remain at 5.0 for DC students
   - Partially as a result of more rigorous exit requirements, ELL funding has increased by over 70% from FY15 to FY20.
ELL UPSFF funding options
This study has identified and quantified several options to “tier” funding for ELL students.

Question from RFA: Should the English Language Learner weight be tiered, reflecting differing costs by service needs, and along what line of differentiation?

Key Decisions and Options to Modify UPSFF

Decision 1: Should the UPSFF weight for ELL students be updated?

Decision 2: If yes, which students should be targeted and what options for changing the formula exist?

A. Grade Level 1 - Tiered funding for ES, MS, HS students
B. Grade Level 2 - Tiered funding for PK-8, HS students
C. Grade Level 3 - Tiered funding for PK-5, 6-12 students
D. Proficiency – targeted funding for lowest WIDA test scores
E. Combination of Grade Levels and Proficiency
F. Additional funding for students designated as “new to country”
G. Additional funding for students identified as SLIFE

Decision 3: Should the change be funded with redistributed or incremental funding?

A. Redistributed funding: new UPSFF ELL categories with higher relative funding weights, paid for by decreasing weights on currently existing ELL student categories, or through changes to the foundation amount
B. Incremental funding: new UPSFF student need categories with higher relative funding weights, paid for with incremental/new funds available over time
Grade Levels - Tiered funding for ES, MS, HS students

ELL Option A – Overview, Opportunities, Challenges

Option Overview and Assumptions

2,863 students impacted (FY19 actual MS and HS ELL students)

Create a grade-based ELL weight with differentiated funding levels for students in Elementary Grades (PK-5), Middle School Grades (6-8), and High School Grades (9-12)

Assumptions: highest rate for students in MS (highest gap), second highest rate for students in HS, lowest relative rate for students in PK-5

Opportunities

Allows for more targeted funding based on student outcomes by grade band

Relatively simple to communicate and calculate

Challenges

Increases complexity of the formula

May not address additional needs of students new to the country, or other ELL students with high needs

Few states allocate funds by grade level
Grade Levels - Tiered funding for ES, MS, HS students

ELL Option A – Implementation Considerations

**Common Definition**

- Currently, the system clearly defines and tracks ELL students by grade level

**Outcomes Data**

- Timely, accurate PARCC score data exists for students in each ES, MS, HS
- Timely, accurate WIDA score data exists for students in each ES, MS, HS; though WIDA results are not reported for all ES grades

**Projection**

- Because the system tracks ELL students by grade level, it is reasonable to assume that accurate ELL enrollment projections can by made by LEA
- Any new projection will require more precision than the current methodology

**UPSFF Legislative Requirements**

- Legislative change likely required for creating new funding category/subcategory under ELL
Grade Levels - Tiered funding for ES, MS, HS students

ELL Option A – Student Funding Formula Goals

**Impact**
- This weight would increase funding for students in grade bands likely requiring additional funding. Though students with higher WIDA scores will also benefit from these funds, total ELL performance tends to decline after 5th grade.

**Accountability**
- Effective, measurable outcomes are more likely since this weight is focused on a specific student group.

**Transparency & Simplicity**
- This option would require an additional weight in the UPSFF, though these students are already counting in the existing UPSFF.

**Incentives**
- Disincentives should not exist for this factor
Grade Levels - Tiered funding for ES, MS, HS students

*ELL Option A – Fiscal Impact (Incremental Funds)*

**Scenario: Incremental Funding**

- 20% increase to ELL weight for EL MS students, 10% increase for EL HS weight, relative to other ELL weights, beginning in FY22
- No corresponding decrease to other areas of the formula
- No change to At-Risk weight for other students

**Fiscal Impact Summary: Incremental Funding**

- **$2.8M** net increase in annual funding for FY22
- **31** LEAs experience increase in UPSFF funds; median gain of **$5,627**
- **0** LEAs experience decrease in UPSFF funds; median loss of **$0**
- **DCPS:** $2.1M (or 4%) increase in ELL funds

See notes on process and methodology for details on calculation of fiscal impact
Grade Levels - Tiered funding for ES, MS, HS students

**ELL Option A – Fiscal Impact (Redistribution of ELL Funds)**

**Scenario: Redistribution of ELL Funds**

- 20% increase to ELL weight for EL MS students, 10% increase for EL HS weight, relative to other ELL weights, beginning in FY22

- Corresponding decrease to existing ELL weight to pay for increase to new weight/rate

- No change to other areas of the UPSFF formula

**Fiscal Impact Summary: Redistribution**

- $0M net increase in annual funding for FY22

- **23 LEAs** experience increase in UPSFF funds; **median gain** of $4,386

- **35 LEAs** experience decrease in UPSFF funds; **median loss** of $7,445

- **DCPS:** $71K (or 0.1%) increase in ELL funds

*See notes on process and methodology for details on calculation of fiscal impact*
## Grade Levels - Tiered funding for PK-8, HS students

*ELL Option B – Overview, Opportunities, Challenges*

### Option Overview and Assumptions

<table>

Grade Levels - Tiered funding for PK-8, HS students

**ELL Option B – Fiscal Impact (Incremental Funds)**

### Scenario: Incremental Funding

- 10% increase to ELL weight for **EL HS students**, relative to other ELL weights, beginning in FY22
- No corresponding decrease to other areas of the formula
- No change to ELL weight for other students

### Fiscal Impact Summary: 10% Increase

- **$1.3M** net increase in annual funding for FY22
- **16 LEAs** experience increase in UPSFF funds; median gain of **$4,220**
- **0 LEAs** experience decrease in UPSFF funds; median loss of **$0**
- **DCPS**: $1.0M (or 1.9%) increase in ELL funds

See notes on process and methodology for details on calculation of fiscal impact.
**Grade Levels - Tiered funding for PK-8, HS students**

*ELL Option B – Fiscal Impact (Redistribution of ELL Funds)*

### Scenario: Redistribution of ELL Funds

- 10% increase to ELL weight for EL HS students, relative to other ELL weights, beginning in FY22
- Corresponding decrease to existing ELL weight to pay for increase to new weight/rate
- No change to other areas of the UPSFF formula

### Fiscal Impact Summary: 10% Increase

- **$0** net increase in annual funding for FY22
- **14 LEAs** experience increase in UPSFF funds; **median gain** of **$5,181**
- **44 LEAs** experience decrease in UPSFF funds; **median loss** of **$2,840**
- **DCPS:** $105K (or 0.2%) increase in ELL funds

See notes on process and methodology for details on calculation of fiscal impact
**Grade Levels - Tiered funding for PK-5, 6-12 students**

Grade Levels - Tiered funding for PK-5, 6-12 students

**ELL Option C – Student Funding Formula Goals**

**Impact**
- This weight would increase funding for students in grade bands likely requiring additional funding. Though students with higher WIDA scores will also benefit from these funds, total ELL performance tends to decline after 5th grade.

**Accountability**
- Effective, measurable outcomes are more likely since this weight is focused on a specific student group.

**Transparency & Simplicity**
- This option would require an additional weight in the UPSFF, though these students are already counting in the existing UPSFF.

**Incentives**
- Disincentives should not exist for this factor
**Grade Levels - Tiered funding for PK-5, 6-12 students**

**ELL Option C – Fiscal Impact (Incremental Funds)**

### Scenario: Incremental Funding

10% increase to ELL weight for EL MS and HS students, relative to other ELL weights, beginning in FY22

No corresponding decrease to other areas of the formula

No change to ELL weight for other students

### Fiscal Impact Summary: 10% Increase

$2.1M net increase in annual funding for FY22

31 LEAs experience increase in UPSFF funds; median gain of $3,939

0 LEAs experience decrease in UPSFF funds; median loss of $0

DCPS: $1.6M (or 3%) increase in ELL funds

---

See notes on process and methodology for details on calculation of fiscal impact.
Grade Levels - Tiered funding for PK-5, 6-12 students

**ELL Option C – Fiscal Impact (Redistribution of ELL Funds)**

### Scenario: Redistribution of ELL Funds

10% increase to ELL weight for EL MS and HS students, relative to other ELL weights, beginning in FY22.

Corresponding decrease to existing ELL weight to pay for increase to new weight/rate.

No change to other areas of the UPSFF formula.

### Fiscal Impact Summary: 10% Increase

$0 net increase in annual funding for FY22.

23 LEAs experience increase in UPSFF funds; median gain of $2,464.

35 LEAs experience decrease in UPSFF funds; median loss of $5,476.

DCPS: $88K (or 0.2%) increase in ELL funds.

---

See notes on process and methodology for details on calculation of fiscal impact.
Proficiency - increase funding for lowest WIDA scores

ELL Option D – Overview, Opportunities, Challenges

Option Overview and Assumptions

2,356 students impacted [ FY19 EL students with PY WIDA below 3.0 ]

[ currently 1/3 of ELL students do not have a recorded WIDA score ]

Increase funding weight based on student proficiency levels as assessed utilizing the WIDA exam.

Opportunities

Align resources based on demonstrated student performance (and needs), as identified by proficiency testing

Adheres to practices by several urban school Districts

Challenges

Increases complexity of funding formula

Current data collection issues

May create unintended incentives

Few states have differentiated weights by proficiency

1/3 of ELL students do not have a recorded WIDA score
Proficiency - increase funding for lowest WIDA scores

**ELL Option D – Implementation Considerations**

### Common Definition
- Currently, the UPSFF does not differentiate amongst levels of ELL proficiency
- About 1/3 of ELL students in the system do not have prior year WIDA scores, primarily because Pre-k students do not take WIDA

### Outcomes Data
- Only 1/3 of ELL students in FY19 had BOTH valid WIDA and PARCC scores
- About 1/3 of ELL students in the system do not have prior year WIDA scores (driven by students in grades PK-1 and “newcomers”)
- There is potential to include WIDA screener data for students in younger grades and students new to the country, though that data is not universally available today, particularly from PCS.

### Projection
- Projecting student proficiency levels relies on past student performance alone, and while this data exists, it is unclear how reliable of an indicator past WIDA will be for projecting future proficiency, especially by LEA
- WIDA is administered in the Spring – data may not be available for next year’s budget cycle
- Not all ELL students record prior year WIDA scores, requiring assumptions on tiering for students with no results

### UPSFF Legislative Requirements
- Legislative change required for creating new funding category. This change would likely require further study on identification, intervention measures and funding amounts/weights for these students.
Proficiency - increase funding for lowest WIDA scores

ELL Option D – Student Funding Formula Goals

- **Impact:** This weight would increase funding for students with lower proficiency on the WIDA exam. The funds would be targeted to LEAs with the lowest performers on the exam from the prior year.

- **Accountability:** Similar to the grade band option, this weight would invest funds to support students with lower proficiency scores.

- **Transparency & Simplicity:** This option would require a structural change to the UPSFF, and would be the only factor driven strictly by proficiency (vs. hours/support requirements for SPED levels). 1/3 of ELL students do not have prior year WIDA test results, primarily because Pre-k students do not take WIDA.

- **Incentives:** This factor could create a disincentive to promote students out of ELL (as schools/LEAs would be "rewarded" for keeping students at a lower proficiency level).
Proficiency - increase funding for lowest WIDA scores

ELL Option D – Fiscal Impact (Incremental Funds)

Scenario: Incremental Funding

10% increase to ELL weight for EL students with PY WIDA scores below 3.0, relative to other ELL weights, beginning in FY22

No corresponding decrease to other areas of the formula

No change to ELL weight for other students

Fiscal Impact Summary: 10% Increase

$1.7M net increase in annual funding for FY22

42 LEAs experience increase in UPSFF funds; median gain of $3,658

0 LEAs experience decrease in UPSFF funds; median loss of $0

DCPS: $1.3M (or 2.5%) increase in ELL funds

See notes on process and methodology for details on calculation of fiscal impact
**Scenario: Redistribution of ELL Funds**

10% increase to ELL weight for ELL students with PY WIDA scores below 3.0, relative to other ELL weights, beginning in FY22.

Corresponding decrease to existing ELL weight to pay for increase to new weight/rate.

No change to other areas of the UPSFF formula.

**Fiscal Impact Summary: 10% Increase**

- **$0** net increase in annual funding for FY22.
- **9** LEAs experience increase in UPSFF funds; median gain of **$1,503**.
- **49** LEAs experience decrease in UPSFF funds; median loss of **$2,094**.
- **DCPS**: **$114K** (or 0.2%) increase in ELL funds.

## Combination of Grade Levels and Proficiency

*ELL Option E – Overview, Opportunities, Challenges*

### Option Overview and Assumptions

2,356 students impacted (FY19: 1,199 grades 3-5 / 1,055 grades 6-12 / 102 alternative)

Create a grade-based ELL weight with differentiated funding levels for students in PK-5 and 6-12. Within each grade-band weight, increase funding weight based on student proficiency levels, as assessed utilizing the WIDA exam.

### Opportunities

- Addresses demonstrated student performance gaps for BOTH students designated as ELL in higher grade levels AND students with lower proficiency levels
- Align resources based on demonstrated student performance (and needs)

### Challenges

- Increases complexity of funding formula
- Current data collection issues
- May create unintended incentives
- Few states have differentiated weights by proficiency
- Currently 1/3 of ELL students do not have a recorded WIDA score
Combination of Grade Levels and Proficiency

**ELL Option E – Implementation Considerations**

### Common Definition
- Currently, the system does not differentiate between levels of ELL proficiency for all students designated as ELL.
- About 1/3 of ELL students in the system do not have prior year WIDA scores, primarily because Pre-k students do not take WIDA.

### Outcomes Data
- Only 1/3 of ELL students in FY19 had BOTH valid WIDA and PARCC scores.
- About 1/3 of ELL students in the system do not have prior year WIDA scores (driven by students in grades PK-1 and “newcomers”).
- There is potential to include WIDA screener data for students in younger grades and students new to the country, but does not yet exist.

### Projection
- Projecting student proficiency levels relies on past student performance alone, and while this data exists, it is unclear how reliable of an indicator past WIDA will be for projecting future proficiency, especially by LEA.
- WIDA is administered in the Spring – data may not be available for next year’s budget cycle.
- Not all ELL students record prior year WIDA scores, requiring assumptions on tiering for students with no results.

### UPSFF Legislative Requirements
- Legislative change required for creating new funding category. This change would likely require further study on identification, intervention measures and funding amounts/weights for these students.
Combination of Grade Levels and Proficiency

*ELL Option E – Student Funding Formula Goals*

**Impact**
- This weight would increase funding for students with lower proficiency on the WIDA exam. The funds would be targeted to LEAs with the lowest performers on the exam from the prior year.
- Additionally, this weight would increase funding for EL students in higher grade bands, which have been identified as having higher needs.

**Accountability**
- Similar to the grade band option, this weight would invest funds directly to students with lower proficiency scores, which means outcomes for these funds should be readily available over time.

**Transparency & Simplicity**
- This option would require a structural change to the UPSFF, and would be the only factor driven strictly by proficiency (vs. hours/support requirements for SPED levels)

**Incentives**
- This factor could create a disincentive to promote students out of ELL (as schools/LEAs would be "rewarded" for keeping students at a lower proficiency level)
Increase funding for students designated as “new to the country” or “recently arrived EL”

**ELL Option F – Overview, Opportunities, Challenges**

### Option Overview and Assumptions

| 947 students impacted (FY19 estimated) |
| Add weight for students currently identified as “new to the system” or “recently arrived” |

### Opportunities

- Data is readily available and collected by OSSE
- These students have been identified as requiring additional support by DC school leaders and advisory group members

### Challenges

- Limited performance data available on these students – most do not have PARCC and WIDA scores.
- Some students may be new to the US, but have had some type of formal education previously
- Increases complexity of funding formula
- Unclear if other states have new to system weights
Increase funding for students designated as “new to the country” or “recently arrived EL”

ELL Option F – Implementation Considerations

<table>
<thead>
<tr>
<th>Common Definition</th>
<th>• OSSE currently tracks students that are flagged as &quot;new to the country&quot;, though it is unclear if the definition is consistent across LEAs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Outcomes Data</td>
<td>• Students that are new to the country have limited testing data available</td>
</tr>
<tr>
<td>Projection</td>
<td>• The projection risk is higher for this designation due to the potential unpredictability from year to year, and the relatively small number of students</td>
</tr>
<tr>
<td>UPSFF Legislative Requirements</td>

*ELL Option F – Student Funding Formula Goals*

<table>
<thead>
<tr>
<th>Impact</th>
<th>• This weight would provide funds to students that are currently designated as new to the country. However, this student flag is currently inconsistently completed in ELL systems across the city.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accountability</td>
<td>• Effective outcomes should be available for this student group if this option were pursued.</td>
</tr>
<tr>
<td>Transparency &amp; Simplicity</td>
<td>• This option would require a new weight in the UPSFF, but would be rather straightforward to implement (# students x weight x foundation)</td>
</tr>
<tr>
<td>Incentives</td>
<td>• This would likely be a time-limited weight (i.e. LEAs receive funding for the first xx years of students attending school in the U.S.), so no disincentives should exist. However, the current definition of new to country is not as clear as SLIFE.</td>
</tr>
</tbody>
</table>
Increase funding for students designated as “new to the country”

**ELL Option F – Fiscal Impact (Incremental Funds)**

### Scenario: Incremental Funding

- **10% increase to ELL weight for students new to the country** relative to other ELL weights, beginning in FY22
- **No corresponding decrease to other areas of the formula**
- **No change to At-Risk weight for other students**

### Fiscal Impact Summary: 10% Increase

- **$694K** net increase in annual funding for FY22
- **10 LEAs** experience increase in UPSFF funds; **median gain** of **$1,970**
- **0 LEAs** experience decrease in UPSFF funds; **median loss** of **$0**
- **DCPS**: **$666K** (or 1.3%) increase in ELL funds

See notes on process and methodology for details on calculation of fiscal impact.
Increase funding for students designated as “new to the country”

**ELL Option F – Fiscal Impact (Redistribution of ELL Funds)**

**Scenario: Redistribution of ELL Funds**

- 10% increase to ELL weight for students new to the country, relative to other ELL weights, beginning in FY22
- Corresponding decrease to existing ELL weight to pay for increase to new weight/rate
- No change to other areas of the UPSFF formula

**Fiscal Impact Summary: 10% Increase**

- $0 net increase in annual funding for FY22
- **3** LEAs experience increase in UPSFF funds; median gain of **$6,553**
- **55** LEAs experience decrease in UPSFF funds; median loss of **$1,306**
- **DCPS:** $167K (or 0.3%) increase in at-risk funds

See notes on process and methodology for details on calculation of fiscal impact.
Increase funding for students designated as “SLIFE”

ELL Option G – Overview, Opportunities, Challenges

Option Overview and Assumptions

154 students impacted (FY20 actual as of January, DCPS only)

Add weight for students designated with “limited or interrupted formal education” or SLIFE. In several urban school Districts, this is considered a separate weight for a limited number of students.

Opportunities

- Identify ELL students with the greatest potential needs from their LEAs and schools
- Provide targeted funding for students with the greatest ELL needs
- Practice is supported in urban school districts, particularly those with potential influx of immigrant populations

Challenges

- Data is not formally collected across LEAs
- No state weight for SLIFE (only school districts)
- Could be considered an LEA funding option, rather than State
- Currently a small number of students
Increase funding for students designated as “SLIFE”

*ELL Option G – Implementation Considerations*

<table>
<thead>
<tr>
<th>Category</th>
<th>Consideration</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Common Definition</td>
<td>• No common definition exists across the system</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Currently, the DCPS tracks SLIFE students but Charters do not</td>
<td></td>
</tr>
<tr>
<td>Outcomes Data</td>
<td>• Prior year PARCC and WIDA exam results do not exist for SLIFE and/or new to the country students</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Outcomes data would be available over time</td>
<td></td>
</tr>
<tr>
<td>Projection</td>
<td>• The projection risk is higher for SLIFE due to a small student population</td>
<td></td>
</tr>
<tr>
<td>UPSFF Legislative Requirements</td>
<td>• Legislative change likely required for creating new funding category/subcategory; no common definition exists</td>
<td></td>
</tr>
</tbody>
</table>
Increase funding for students designated as “SLIFE”

**ELL Option G – Student Funding Formula Goals**

**Impact**
- This option would fund students with limited or interrupted education, which is a criteria only currently documented by DCPS. It is also a small number of students, so the funding level would likely need to be relatively large to make an impact.

**Accountability**
- If implemented, this would be a highly focused weight focused on a small student group. Outcomes should be readily measurable.

**Transparency & Simplicity**
- This option would require a new weight in the UPSFF, but would be rather straightforward to implement (# students x weight x foundation)

**Incentives**
- This would likely be a time-limited weight (i.e. LEAs receive funding for the first xx years of students attending school in the U.S.), so no disincentives should exist.
Increase funding for students designated as “SLIFE”

ELL Option G – Fiscal Impact (Redistribution of ELL Funds)

Scenario: Incremental Funding

- 10% increase to ELL weight for EL SLIFE students, relative to other ELL weights, beginning in FY22
- No corresponding decrease to other areas of the formula
- No change to At-Risk weight for other students

Fiscal Impact Summary: 10% Increase

- $118k net increase in annual funding for FY22
- 27 LEAs experience increase in UPSFF funds; median gain of $1,125
- 0 LEAs experience decrease in UPSFF funds; median loss of $0
- DCPS: $87K (or 0.2%) increase in ELL funds

See notes on process and methodology for details on calculation of fiscal impact.
Increase funding for students designated as “SLIFE”

ELL Option G – Fiscal Impact (Redistribution of ELL Funds)

Scenario: Redistribution of ELL Funds

10% increase to ELL weight for EL SLIFE students, relative to other ELL weights, beginning in FY22

Corresponding decrease to existing ELL weight to pay for increase to new weight/rate

No change to other areas of the UPSFF formula

Fiscal Impact Summary: 10% Increase

$0 net increase in annual funding for FY22

15 LEAs experience increase in UPSFF funds; median gain of $187

43 LEAs experience decrease in UPSFF funds; median loss of $89

DCPS: $2K (or 0%) increase in ELL funds

See notes on process and methodology for details on calculation of fiscal impact
ELL student outcomes data and analysis
Student outcomes data from the last three years shows marked improvement for elementary school ELL students, though increasing gaps for middle and high school students

1. As measured by PARCC, ELL student outcomes have **improved markedly over the last three years**, primarily driven by elementary school students at WIDA level 3 and above.

2. The **proficiency gap in math has decreased by 5.2 percentage points** since FY17, driven by elementary school students scoring 3 or greater on the WIDA exam.

3. The **achievement gap for all** students with lower WIDA scores (below 3.0) and their non-ELL peers has **increased from FY17 to FY19 at each grade level band: ES, MS, and HS**

4. Additionally, proficiency levels and gaps **increased for Middle and High school ELL students** as compared to Elementary school students.

5. Though students new to the country have been identified as requiring significant additional supports through LEA interview and Advisory Group meetings, limited performance data is currently available for this group of students for PCS:
   - As of January 2020, **DCPS had 154 students identified as SLIFE** in the ELLevate system
   - Though this group of students is relatively small, they require significant supports, including altered scheduling, materials and curriculum
Proficiency gains for DC ELL students have been driven by students scoring 3 or higher in the WIDA exam. Gains are particularly significant in grades 3-5.

Notes:
- ELL students counted: FY15 – FY19 students flagged as "Yes" for English Learner Status and "Yes" for Enrollment Audit Population.
- Including Valid PARCC scores only; excludes ELL students with NO WIDA scores reported.
- PARCC scores used for valid scores reported from students in UPSFF grade levels 3-12 only
ELL students with 3+ WIDA scores in grades 3-5 have both shown improved proficiency as well as materially closed the achievement gap with non-ELL students from FY17 to FY19...

Notes:
- ELL students counted: FY15 – FY19 students flagged as “Yes” for English Learner Status and “Yes” for Enrollment Audit Population.
- Including Valid PARCC scores only; excludes ELL students with NO WIDA scores reported.
- PARCC scores used for valid scores reported from students in UPSFF grade levels 3-5 only
...while ELL students in grades 6-12 have shown mixed results when compared to elementary school, with an increased achievement gap from FY17 to FY19.

**Notes:**
- ELL students counted: FY15 – FY19 students flagged as "Yes" for English Learner Status and "Yes" for Enrollment Audit Population.
- Including Valid PARCC scores only; excludes ELL students with NO WIDA scores reported.
- PARCC scores used for valid scores reported from students in UPSFF grade levels 6-8 only.
Further, proficiency levels are highest in grades 3-5 for all students, with highest achievement gaps for math in grades 6-8...

Largest drop-off in proficiency for ELLs is between 5th and 6th grade (between ES and MS)

Notes:
- ELL students counted: FY15 – FY19 students flagged as "Yes" for English Learner Status and "Yes" for Enrollment Audit Population.
- Including Valid PARCC scores only
- PARCC scores used for valid scores reported from students in UPSFF grade levels 3-12 only
- There are significantly fewer test takers (and data points) for grades 11 and 12
…and ELA gaps in FY19 are highest in grades 6-10, though proficiency levels are mixed for all grades.

**FY19 % PARCC Proficiency 4+ ELA by Grade Level**

ELL national research and benchmarking
National research supports tiered funding, though unclear whether this should be executed at the State or LEA-level

1. National experts, as well as published reports and research, support targeted funding for targeted groups of ELL students

2. However, most states fund ELL students at the same level, without differentiated funding based on need. North Dakota and Hawaii fund based on proficiency levels, Massachusetts funds ELL students based on grade bands, while several large, urban school districts fund by proficiency level and grade band.

3. This report identifies multiple options to tier ELL funding, including grade levels, SLIFE students and proficiency levels.

DCPS enrolls 54% of all DC students and enrols over 70% of ELL students (which has increased each of the last five years)
The Migration Policy Institute in its August 2016 briefing, “Funding an Equitable Education for English Learners in the United States”, recommends three areas policymakers should consider in funding mechanism:

1. **Develop funding categories for subpopulations of ELs**, such as students with limited or interrupted formal education or different grade levels

2. **Fund students for as long as they qualify, rather than instituting caps**, given that schools must continue to provide services for students who need them (and that **accountability measures** provide incentive to improve student performance)

3. **Set aside emergency funds to support unexpected inflows of immigrants and refugees** to address the emergent needs of schools and districts who face large, unforeseen costs.

The Advisory Group has primarily focused on subpopulation funding, though other items may need to be considered when implementing any changes to ELL funding.
National Research
What does research say about best practices in funding ELL students?

• States are less likely to have tiers of ELL funding or as many tiers as compared to Districts. For example, Cleveland and NYC both have 6 tiers based on ELL grade level and English proficiency level.

• Schools with the same demographics can spend dollars the same way and get different outcomes; caution against moves to restrict ELL funding to ELL-only services, and suggest looking at outcomes.

• There is no empirical "right" ELL weight -- look instead at ELL performance in relationship to performance of other groups as a way to choose a weight (and examine the outcomes of at-risk ELLs versus non-at-risk ELLs, or HS ELLs verses ES ELLs, etc.)
State tiered funding recap:

**North Dakota tiers funding based on proficiency level**

Students qualify for EL services if the ONE of the domain Screener scores is below the following:

- 5.0 Overall Composite Proficiency Level OR
- 3.5 Proficiency Level on any of the four domains: Listening, Speaking, Reading, or Writing
- 1st semester Kindergarten and 2nd semester Pre-K students who only take the Listening and Speaking domains would qualify for EL services if either Listening or Speaking is below a 3.5 Proficiency Level.

The State has three different funding levels or tiers:

- ELL 1 – first of six categories of proficiency (Least Proficient): 0.40 multiplied by the # of FTE students enrolled
- ELL 2 – second of six categories of proficiency: 0.28 multiplied by the # of FTE students enrolled
- ELL 3 – third of six categories of proficiency: 0.07 multiplied by the number of FTE students enrolled and have not been in the third of six categories of proficiency for more than 3 years

State tiered funding recap (cont.):

*Hawaii also tiers funding based on English proficiency, not by grade*

- Weights for ELL students are composed of 3 categories and students are placed into these categories using the WIDA Screener and W-APT. ACCESS for ELLs is the assessment instrument used to measure and report annual English language growth. See the “ELL Identification Flow Chart” link for more details.
  - **Non-English Proficient (NEP) : 0.389 (FY20 Per Pupil $1,736.09)**
    - Students have limited or no proficiency in understanding, speaking, reading, and writing English.
  - **Limited English Proficiency (LEP): 0.194 (FY20 Per Pupil $868.04)**
    - Students are functionally proficient in understanding and speaking English but limited in reading and writing skills.
  - **Fully English Proficient (FEP) : 0.065 (FY20 Per Pupil $289.35)**
    - Students are proficient in the four basic language skills (listening, speaking, reading, and writing) but may be experiencing academic difficulties in the content areas.

- As of September 2019, a state “committee on weights” recommending increasing the weights in 2020-2021 to:
  - NEP: .5867 (+51%)
  - LEP: .2933 (+51%)
  - FEP: .0978 (+50%)

State tiered funding recap (cont.): Massachusetts tiers funding by grade band, but a recent commission has recommended moving towards a unified weight for all grades.

Per the FY20 funding guide, Massachusetts English learner (EL) status depends on a student’s home language and English language proficiency. The formula established three funding levels:

1. English language learners (ELs) (grades PK–5) - $2,275.85 per pupil
2. English language learners (ELs) (grades 6–8) - $2,380.50 per pupil [highest level]
3. English language learners (ELs) (grades 9–13) - $1,858.15 per pupil

The implied weights based on junior/middle foundation of $7,755.82, are 0.29 for PK-5, 0.31 for grades 6-8 and 0.24 for grades 9-13. As a result, the highest weight and rate supports students in the middle school grades, which has a weight over 22% higher than High School students.

A report by the Foundation Budget review commission recommended to “Increase the increment for all grade levels, including high school, to the current effective middle school increment…This would increase the range of ELL-only weightings and expand available funds for staff-intensive high school age interventions.” This would also effectively eliminate grade band differentiated weighting for the state.
Urban district tiered funding recap:

There are three program options for ELLs: Dual Language (DL), Transitional Bilingual Education (TBE), and freestanding English as a New Language (ENL, formerly known as ESL). Each of the three program types offers students a course of instruction that enables them to stay on track to meet promotion and graduation requirements, including courses that are aligned to the Common Core Learning Standards, as well as the New Language Arts Progressions. In DL and TBE programs, students also take courses aligned to the Home Language Arts Progressions.

UPSFF ELL funding options
Advisory Group Voting Outcomes
The Advisory Group favored tiering funding for PK5 and 6-12 students

**OPTION**

- **A** Three tiers - PK5, 6-8, 9-12
  - Support: 3.78
  - Neutral: 3.44
  - Do not Support: 2.33

- **B** Two tiers - PK8 and 9-12
  - Support: 3.78
  - Neutral: 3.44
  - Do not Support: 2.33

- **C** Two tiers - PK5 and 6-12
  - Support: 3.78
  - Neutral: 3.44
  - Do not Support: 2.33
Advisory Group feedback on tiered funding: Less overall support for WIDA/proficiency-based funding, however....

OPTION

Tie UPSFF funding with proficiency levels (as determined by WIDA scores)?

Support: 3.56
... voting and discussion surfaced a wide dispersion of considerations for utilizing WIDA/proficiency...
...leading to support for both grade band (alone) weighting, as well as proficiency AND grade band weighting

Primary concerns documented for WIDA/Proficiency-based weighting were driven by implementation & data challenges, along with consideration for creating misaligned incentives for students and schools
Advisory Group feedback on tiered funding: More support for SLIFE weight than current “New to Country” designation

OPTION

F. Add weight for students that are "new to U.S."?

G. Add new weight for SLIFE?
Advisory Group feedback on tiered funding: Support implementation based on availability of new funds

DEcision

A

Based on availability of new funds?

B

Reallocation of existing funds?

Support Neutral Do not Support

0 1 2 3 4 5

1.33

4.29
Impact of “WIDA 2.0”
WIDA 2.0: ACCESS test revised to require higher raw score to achieve each WIDA proficiency level

• All DC ELL students are required to take the WIDA test. For those students that have WIDA ACCESS scores, only students with a composite score of 5.0 or above are automatically exited from ELL status.

• However, in 2016-17 (for tests administered spring 2017) WIDA revised ACCESS so that English-learners must demonstrate more sophisticated language skills to achieve the same proficiency-level scores (1-6). The test became more rigorous, resulting in many more students with ELL status around the country. This has become known as “WIDA 2.0”

• Some states adjusted their exit scores as a result of this increased rigor, while others saw a significant decrease in exit rates.
  – Clark County, NV exit rates dropped to 8% in 2016-17 from 16% in 2015-16
  – Albuquerque, NM saw a drop from 16% to 1% of ELs meeting proficiency bar

• OSSE has not communicated process or timing associated with any potential changes to WIDA exit requirements. Depending on the outcome of this process, a significant number of students may exit ELL if the exit score is lowered.
WIDA 2.0: Many states lowered WIDA ACCESS score bar due to test changes

Many states **lowered the composite score required** for reclassification (or consideration for reclassification) and eliminated individual domain requirements

<table>
<thead>
<tr>
<th>State</th>
<th>Previous</th>
<th>Updated</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colorado</td>
<td>5.0 composite</td>
<td>4.0 composite</td>
</tr>
<tr>
<td>Maine</td>
<td>6.0 composite (only state with this bar)</td>
<td>5.0 composite</td>
</tr>
<tr>
<td>Massachusetts</td>
<td>5.0 composite; 4.0 for reading + writing</td>
<td>4.2 overall; 3.9 reading + writing</td>
</tr>
<tr>
<td>Wyoming</td>
<td>5.0. composite; 4.0 in all domains</td>
<td>4.6 composite</td>
</tr>
<tr>
<td>Virginia</td>
<td>5.0 composite; 5.0 for reading + writing</td>
<td>4.4 composite</td>
</tr>
</tbody>
</table>

**OSSE has not (yet) altered the current benchmark of 5.0**, though they are researching the options in future years. No specific timetable has been communicated as of the publishing of this report.
Impact of WIDA 2.0 on DC: Annual total UPSFF funding for ELL has increased 71% from FY15 actual to FY20 projected. At the same time total ELL students have increased 50%.

Notes
• Funding is not adjusted for inflation.
• Funding data uses actual charter funding from “Alonso files” and DCPS budgeted funding from budget books – FY17 and FY18 reflect rate adjustments (per Foundation Level letter) due to retroactive WTU increases.
• Enrollment data pulled from Enrollment Audit Reports at: https://osse.dc.gov/page/data-and-reports-0
Impact of WIDA 2.0 on DC: Since the increase in rigor for WIDA 2.0, there has been an increase in the proportion of ELL students in the system, starting in FY18

<table>
<thead>
<tr>
<th>% ELL Students</th>
<th>UPSFF Enrollment</th>
</tr>
</thead>
<tbody>
<tr>
<td>FY14 8.84%</td>
<td>FY15 8.77%</td>
</tr>
<tr>
<td>FY16 9.01%</td>
<td>FY17 9.37%</td>
</tr>
<tr>
<td>FY18 11.09%</td>
<td>FY19 11.24%</td>
</tr>
<tr>
<td>FY20 11.72%</td>
<td></td>
</tr>
</tbody>
</table>

Enrollment data (ELL total and UPSFF total) pulled from Enrollment Audit Reports at: https://osse.dc.gov/page/data-and-reports-0
Impact of WIDA 2.0 on DC: Assuming historical growth in proportion of ELL students, there may have been about \( \sim 1,500 \) to \( 2,000 \) fewer students designated as ELL in each FY18 to FY20.

Alternative scenario assumed % ELL assumes the proportion of ELL students would grow at a rate of 0.7% annually – the average of actual YOY increases in FY14-FY17.
Impact of WIDA 2.0 on DC (alternative 1): As a result of the increased WIDA exam rigor and not adjusting the required WIDA score to test out of ELL, there are more ELL students in the system, resulting in $7.6M to $11.1M additional UPSFF ELL spend (under these assumptions)

<td>$8,423,086</td>
<td>$11,110,113</td>
</tr>
</tbody>
</table>

Note this assumes actual ELL student count from the audited enrollment files for UPSFF ell, per audited enrollment files – NOT budgeted ELL enrollment in DCPS budget books, which is ~600 and ~850 fewer students in FY18 and FY19 respectively.

FY20 reflects budgeted UPSFF ELL enrollment
Impact of WIDA 2.0 on DC (alternative 2): If OSSE decreased the required WIDA composite score to 4.4 or 4.5 (similar to other states), from the current requirement of 5.0, FY19 UPSFF for ELL would have decreased by $3.6M or $4.5M

**Quantifying assumed FY19 ELL spend on students with WIDA scores 4.4 - 4.9**

- 845  Count of FY19 EL students with WIDA scores 4.4 - 4.9
- $5,222  per pupil UPSFF for ELL student
- **$4,412,590**  total FY19 ELL funds for students scoring 4.4 - 4.9

**Quantifying assumed FY19 ELL spend on students with WIDA scores 4.5 - 4.9**

- 680  Count of FY19 EL students with WIDA scores 4.5 - 4.9
- $5,222  per pupil UPSFF for ELL student
- **$3,550,960**  total ELL funds for students scoring 4.5 - 4.9

Count of FY19 students uses student-level WIDA data for students classified as EL in FY19 and students in the “enrollment audit population”.
